Re: Mirna Cisneros and Karen Cervantes

Dear Mr. Tiedemann:

This is in response to your letter of today regarding Carla Barboza.

As I told you several times before, the City's, so called, "fact finding" investigation is nothing but a sham if we are not allowed access or participation. You made it abundantly clear already the City will not accept our requests. We do not need you now to be Ms. Barboza's mouthpiece to reiterate that. She could have responded to my letter herself.

We are not here to facilitate a sham. If the City wants to continue to unilaterally conduct this "investigation", then it can unilaterally find or manufacture whatever evidence and witnesses it wants. We, on the other hand, will arrive to the ultimate truth in open proceedings through discovery with witnesses under oath.

If you and your firm want to continue to "dig in" and show us and your clients what big scary lawyers you are, go ahead and keep billing the City for that. However, if you and your firm want to do right for the City and truly resolve these pending issues, don't treat us like we don't know what we are doing.

We told you before, we do not need you to keep sending us letters pretending to be seeking the truth. Everybody knows you are just looking for information to protect the City and the Mayor. You could care less about the Mayor's victims.

Please contact us at your convenience when you feel the need to truly resolve the mess Mr. Valdivia created.
